# HISTORY OF LEGEND TREN

Legend Tren originated from a small discussion between a native youth named Indra Tony Syayuti and one of the Tuban elders, Bpk. Karnoto H.S, who really wants the existence of the Lontar Tree or Nira Siwalan to be sustainable and not lost in the era of progress.

From this discussion, a strong intention was achieved, to continue to fight wholeheartedly so that the existence of this ancestral heritage tree remains sustainable. The reasons are as follows:

1. Lontar trees or Siwalan trees, cannot be cultivated.
2. Lontar trees or Siwalan trees, can only be harvested after at least 25 years of age.
3. The Lontar tree or the Siwalan tree, has begun to become extinct in several areas.
4. Lontar tree or Siwalan tree, only grows in certain areas.
5. Lontar trees or Siwalan trees, which exist are the legacy of our ancestors.

So that with the facts above, it will further strengthen us to always innovate, so The existence of the Lontar Tree can still be sustainable and can bring benefits to all Indonesian people.
