aefaa

8 drops
everyday helps with
uric acid, cholesterol
and **blood sugar level**

High concentrate Apple Cider Vinegar

Excess uric acid in the body can be lowered by increasing urine's pH, this breaks down the crystals in the joints. Kaempferol and Quercetin present in ACV inhibits an enzyme called Xanthine Oxidase that breaks down purines into uric acid hence preventing the formation of new painful crystals in joints

ACV lowers cholesterol by returning blood pH back to neutral, the liver then sense the unnecessary amount of cholesterol in the blood stream and release HDL to bring back Cholesterol to liver to break it down.

MORINGA THE MIRACLE TREE

aefaa DROPS

High concentrate ACV with
Moringa extract

MORINGA

In type 2 diabetes the body becomes insensitive to insulin causing the liver to produce more and end up exhausting the cells. After that the body lacks enough insulin to absorb sugar in the blood stream. A recent study stated that moringa reversed hepatic insulin insensitivity.

APPLE CIDER VINEGAR

Not only ACV serves as a natural preservative and but it can also improve insulin sensitivity
