-  **Phone** : +62 85643466159
-  **Email** : guponsekarlangit@gmail.com
-  **Website** : www.guponsekarlangit.com

Description

Sekar Langit is named after the Sekar Langit waterfall, which flows and serves as a water source for the irrigation of all the surrounding farmers' fields. The quality of the spring is excellent, resulting in improved crop yields each year. This success is attributed to a campaign launched by Gupon members since 2013, promoting a ban on deforestation in the nearby hills and the use of chemicals in the fields. As a result, Sekar Langit rice, an organic product cultivated by farmers, has become a flagship rice in Magelang Regency, distributed throughout Indonesia, and trusted by major industries such as KFC.

Description

Why choose WUENAK Fried Onion? It has an attractive appearance, a beautiful golden color, and an exclusive look. The taste is WUENAK, crispy, and aromatic. We use Sumenep Red Onion as the raw material, specifically chosen for premium quality fried onions, not just any onion used in kitchens. Our garlic is of the Kating variety, which has a better aroma and taste and is more expensive. It is not oily and remains dry due to a special draining technique (remember to close tightly after opening; it stays fresh longer when stored in a cool, dry place).

Description

Dr.Koffie is a company engaged in the coffee industry from upstream to downstream. We collaborate with many Lampung robusta farmers, aiming to improve the quality and selling price of robusta coffee. Most Lampung robusta coffee is sold as commercial grade; however, through our partnership with Dr.Koffie, we have created high-quality robusta coffee, commonly referred to as Robusta Fine. This Robusta Fine coffee has a unique character that doubles its selling price compared to commercial grade. The robusta coffee processed by farmers is carefully crafted into ready-to-brew coffee with various packaging options.

Description

Super Roti bran bread was inspired by the rising incidence of degenerative diseases in Indonesian society, the trend of quickly getting bored and seeking something new, returning to nature, and embracing a healthy lifestyle. We see this as an opportunity to introduce an out-of-the-box product that few have explored. Super Roti chose bran, which is often regarded as waste or used as livestock feed (for cows, chickens, and ducks), transforming it into a healthy food rich in fiber, vitamins, minerals, and antioxidants. Super Roti is made without refined sugar, margarine, or eggs, and is also available in gluten-free variants. We embrace the concept of empowering local farmers, collaborating with nearby SMEs for material sourcing, aiming for sustainable business growth.
